\$100/Mo. Per Machine

Flexible Solutions for your Township Needs

It's difficult for townships to keep up with constantly evolving technology when you have other priorities. Security vulnerabilities, data loss and hardware failures are dealt with as they occur. Prismworks Technology has created a Desktop as a Service solution that simplifies these technology pain points. This service creates a proactive approach to managing your technology. No matter the size or budget of your township this solution allows for better security, data backup & updated hardware at a low monthly cost.

Desktop as a Service

Have You Recently Purchased New Equipment?

Prismworks Technology has you covered. We have developed a solution that we will support your existing laptop & desktop investment if they meet our minimum system requirements. We will add our security software and support your system at a low monthly cost. When the system fails we will replace the computer with a new machine at our standard service cost.
